SUN PROTECTION

LIFESYSTEMS SUN PROTECTION HAS BEEN FORMULATED TO PROVIDE YOU WITH MAXIMUM PROTECTION FROM HARMFUL UVA AND UVB RAYS IN HOT CLIMATES AND EXTREME ENVIRONMENTS. EACH SUNSCREEN PROVIDES BROAD SPECTRUM PROTECTION AND CONTAINS KEY FEATURES SPECIFIC TO TRAVEL OR MOUNTAIN USE.

IN WARM SEAS IT IS NOT UNCOMMON TO COME ACROSS JELLYFISH. A JELLYFISH STING CAN BE PAINFUL, SO WE HAVE WORKED WITH EXPERTS TO INCORPORATE A HIGHLY EFFECTIVE JELLYFISH REPELLENT INTO OUR ACTIVE SUN CREAM RANGE. THIS MEANS THAT YOU CAN BRUSH PAST A JELLYFISH AND IT WON'T STING YOU.

ACTIVE 25 & 40

DETAILS

The range of Active Sun Creams are ideal for travel and low-level outdoor use. Our new formulation now offers 5-star UVA protection, with a choice of either SPF25 or SPF40 creams. They are water-resistant, so can be worn in the sea without wearing off quickly. Aside from concerns about sunburn, being stung by a jellyfish is one of the most painful experiences when spending time in the sea. We have developed a Jellyfish Repellent formula and included it in our range of Active sun creams.

FABRIC TREATMENTS

WITH THE HELP OF SCIENTIFIC RESEARCHERS, WE HAVE CREATED SOPHISTICATED ANTIMOSQUITO AND ANTIBACTERIAL TREATMENTS FOR USE ON FABRICS. THE SKILL IN FORMULATION IS TO USE ADDITIVES LIKE BINDING AND CROSS-LINKING AGENTS WHICH ENCOURAGE THE PARTICLES TO ADHERE TO THE FABRIC. SCIENTIFIC TESTING HAS SHOWN THAT OUR ANTIMOSQUITO AND ANTIBACTERIAL TREATMENTS LAST A CONSIDERABLE LENGTH OF TIME ON THE FABRIC AND ARE WASH RESISTANT.

AX ANTIBACTERIAL (6347)

DETAILS

Forms a protective layer which kills bacteria (including E Coli, Salmonella and MRSA), keeping fabrics cleaner and smelling fresher. When equipment is put into storage, it provides an opportunity for bacteria to develop, resulting in odour, discolouration and degradation. AX Antibacterial will help protect your equipment. One treatment lasts for up to 2 years or 35 washes (40° machine wash).

TECHNICAL INFORMATION

Ideal for use on tents, mosquito nets, blankets and sleeping bags. One bottle will treat up to 7 square metres of fabric.

WATER PURIFICATION

EXPLORERS AND TRAVELLERS WILL INEVITABLY BE DRAWN TO AREAS WHERE LEVELS OF TECHNOLOGY AND HYGIENE ARE NOT THE SAME AS THEY ARE AT HOME. WATER SUPPLIES MAY CONTAIN BACTERIA, PARASITIC CYSTS AND VIRUSES. THIS CAN LEAD TO STOMACH UPSETS, SUBSEQUENT DEHYDRATION AND OTHER ILLNESS.

CHLORINE AND CHLORINE DIOXIDE ARE BOTH VERY EFFECTIVE WATER DISINFECTANTS. THE TASTE OF CHLORINE CAN BE REMOVED BY USING NEUTRALISING TABLETS ONCE THE PURIFICATION PROCESS IS COMPLETE. ALTERNATIVELY, OUR CHLORINE DIOXIDE TREATMENT OFFERS GREATER PROTECTION THAN THAT OF CHLORINE AND HAS LITTLE OR NO AFTER TASTE.
