## FISH WITHOUT MEAT

uax® oblečení je vyrobeno z kvalitních bavlněných vláken, která jsou pěstována ve vyhlášených bavlnářských oblastech Egyptu a Uzbekistánu a vykazují nejlepší užité vlastnosti – příjemný omak, měkkost, hebkost a splývavost. Tím jsou zajištěny i vlastnosti pro bezproblémovou údržbu a užívání našich výrobků v běžném životě. Všechny produkty uax jsou vyrobeny z materiálu, který je upletený z příze SKANÉ.

Bavlna používaná při výrobě produktů uax® prochází speciálním procesem sanforizace. Tento proces zajišťuje udržení perfektních užitných vlastností – zvláště sražlivosti. Sanforizace je kompresivní vysrážení bavlny, které zapříčiní, že se vlákna zafixují a už se nepohybují. Díky procesu sanforizace uax® garantuje sražlivost u výrobků z úpletu 4% a výrobků z tkaniny 3%, což kvalitativně překračuje normu běžnou v Evropě.

uax® garantuje kvalitu – materiálovými, výrobními, výstupními kontrolami. Tímto způsobem je zajištěna vysoká jakost produktů.

uax® clothing is made of top quality cotton fibres, which are grown in renowned cotton growing regions in Egypt and Uzbekistan and are proven to have the best utility properties – they are pleasant to the touch, soft, smooth and hang well. This also ensures problem-free maintenance and use of our products during every-day wear.

All products by uax are made of material that is woven from SKAN yarn.

Cotton used for manufacture of uax® products undergoes the special process of sanforisation. This process ensures that the excellent utility properties – particularly less shrinkage – are maintained.

Sanforisation is compressive shrinkage of cotton, which results in the fibres being locked and not moving any more.

Thanks to the sanforisation process uax® guarantees shrinkage of 4% in the case of products made from knitwear and only 3% in the case of products made from woven fabric, which qualitatively exceeds the usual European standard.

uax® is a guarantee of quality – by means of material, production and output inspections.

This method ensures the high quality of products.
